

Muhammad Ghifar Ramdhani

Fullstack Developer

+6285591710309 | ghifarom@gmail.com | Jakarta, Indonesia

[LinkedIn](#) | [Github](#) | [Portfolio](#)

Fullstack Developer with hands-on experience building responsive and scalable web applications using React.js, JavaScript, and modern frontend tools. Skilled in creating clean UI, managing application state with Redux Toolkit, and integrating RESTful APIs. Experienced in collaborative development environments using Git and applying clean code principles. Possess additional backend knowledge using Golang (Gin) and PostgreSQL, enabling effective collaboration across the full web development lifecycle.

Experiences

Nashta Group Global Utama - Depok, Indonesia

Apr 2026 - present

Frontend Web Developer (Project Based)

Led frontend development for two concurrent projects: **Smart-Links** (internal link shortener with analytics) and **Asset-Track** (QR-based inventory system with PWA capabilities), delivering scalable and production-ready interfaces under tight timelines.

- Architected modular and scalable frontend systems using **React + TypeScript**, reducing development complexity and improving maintainability
- Implemented **Redux-based state management**, ensuring predictable data flow across complex features (analytics, asset tracking, and real-time interactions)
- Established and enforced **UI/UX standards**, resulting in consistent design across both applications
- Drove seamless **API integration** with backend services, minimizing integration issues and improving data reliability
- Led **code reviews and technical direction**, maintaining high code quality and reducing potential bugs during development
- Accelerated team productivity by providing **hands-on debugging support and technical mentorship**
- Collaborated closely with backend engineers to align on **API contracts, data structures, and system workflows**

Key Achievements:

- Delivered 2 fully functional applications within a 1-month sprint cycle
- Reduced UI inconsistencies and rework through standardized component architecture
- Improved development efficiency through clear state management and reusable components

Tech Stack: React, TypeScript, Redux, Tailwind CSS, REST API, PWA

Koda Tech Academy - Depok, Indonesia

Dec 2025 – Apr 2026

Fullstack Web Developer

Shortlink | Mar 2026

- Developed a responsive web application optimized for both mobile and desktop users using React.js and Tailwind CSS.
- Integrated PostgreSQL for persistent storage and Redis for caching.
- Built features such as link creation, redirection, analytics (click tracking), and soft delete.
- Secured endpoints using JWT authentication and implemented middleware for request handling.
- Designed API documentation using Swagger/OpenAPI.

Coffee Shop - Coffee Shop Web App | Dec 2025 – Apr 2026

- Developed a full-featured Coffee Shop platform with responsive design for both mobile and desktop users.
- Integrated Product listing, seat selection, and user authentication using Golang and PostgreSQL, secured with JWT.
- Built a modular frontend using React.js, Tailwind CSS, React Router, and Redux Toolkit, with role-based access for users and admins.
- Resulted in a functional, end-to-end booking system showcasing fullstack development capabilities.

Movie Ticketing – Movie Tickizts Web App | Nov 2025 – Jan 2026

- Developed a responsive Movie Tickizts web application optimized for both mobile and desktop users using React.js and Tailwind CSS.
- Implemented state management with Redux Toolkit and handled client-side routing using React Router.
- Built reusable UI components and integrated the frontend with backend APIs for authentication and data management.
- Implemented role-based interfaces for users and admins to manage orders and application features.
- Delivered a functional end-to-end web interface demonstrating modern frontend development practices.

Education

Koda Tech Academy - Depok, Indonesia

Nov 2025 – Apr 2026

Fullstack Web Developer

- Learned front-end development practices: React Js, Redux Toolkit, Tailwind CSS.
- Learned back-end development practices: Golang, Gin-Gonic, PostgreSQL.
- Basic DevOps practices: Working with WSL, Docker, and SSH for local deployment.

SMAN 2 Karawang - Karawang, Indonesia

Jul 2014 – 2017

Social Science (IPS)

- Gained comprehensive knowledge in social studies, economics, and humanities.
- Active member of Music Band Club (e.g., vocalist/guitarist/drummer), developing teamwork, creativity, and time management skills.
- Participated in school performances and local music competitions.

SKILL

Frontend Development – React.js, Next.js, Redux, React Query, Tailwind CSS, Material UI, HTML5, CSS3, JavaScript (ES6+), TypeScript, Responsive Design, Webpack, Vite

Backend Development – Golang, Gin, REST API, Clean Architecture, Middleware, JWT Auth, Database Integration

Database – PostgreSQL, Redis, GORM, SQL Optimization

DevOps & Deployment – Docker, Docker Compose, CI/CD (GitHub Actions, GitLab CI), Linux CLI,

Testing – Unit Testing (React Testing Library, Jest), Integration Testing (Postman, Go test),

API Design – RESTful API, gRPC, OpenAPI/Swagger Documentation

Version Control – Git, GitHub, GitLab, Git Flow

Project Management – Agile/Scrum, Jira, Trello, Notion, Technical Documentation

Cloud & Hosting – AWS (EC2, S3, RDS), Vercel, Railway, Firebase

Security & Best Practices – Input Validation, HTTPS, OAuth2, JWT, CORS
